# PROTECT THE FUTURE OF LIVESTOCK AT THE OREGON STATE FAIR!

Livestock exhibitors and their livestock are very important to us. However, livestock can be a source of contamination, including pathogens and zoonotic animal diseases. Our goal at the Oregon State Fair is to create and maintain an environment where livestock, exhibitors and visitors to the fair can co-exist in a safe and pleasurable place.

The Oregon State Fair has recently placed a strong emphasis on Bio-Security against animal diseases like H3N2v (Swine) Influenza as well as Pathogen Control for harmful bacteria like Salmonella and E. coli.

Pathogen Control: We have recently completed a comprehensive assessment of our entire site. As a result, we have reconfigured the location of our signage and hand washing stations as well as improved our sanitation and record keeping activities in order to keep our barns as clean and sanitary as possible.

Bio-Security: We have recently implemented a comprehensive bio-security protocol to minimize the risk of disease transmission from animals to humans, as well as between animals. This bio-security protocol includes veterinarian inspections prior to entry, and/or throughout the fair, as well as disinfection of all pens/stalls during changeover between each group of animals.

## But we need your help!

As an exhibitor we need you to be ROLE MODELS to visitors and others at the fair. This includes your ongoing efforts to manage animal waste, properly store waste management equipment (shovels, pitchforks, and wheelbarrows) away from visitors, and avoid drinking and eating in the barns. Additionally, we need you to notify us if you see any signs of illness in animals around you, and if any of your animals are showing signs of illness prior to fair, to leave them home.

By doing YOUR part to reduce the likelihood of contamination from pathogenic bacteria and/or the transmission of zoonotic diseases at the fair we can continue to host animal events like the Oregon State Fair long in to the future.

Thank you,
